

Extending the Learning

Below are ways to extend the learning beyond the workshop. This strategy is a vital part of blended learning and creating a flipped classroom, but it can work for any type of workshop or topic.

1. Provide a list of relevant or related materials.

This can include articles, books, chapters, videos, websites, and online courses, for example. Ask people to pick something from the list that interests them, and commit to doing it in the next two weeks. See the next page for some extended learning opportunities for you.

2. Set up opportunities to practice.

Give your participants specific activities to do to when they return to their regular environments. Options include a set of worksheets to complete, online assessments to submit, or a behavior to repeat a certain number of times. Consider having them schedule appointments on their calendar.

3. Empower shared learning in pairs or groups

Encourage people to meet in pairs or groups for discussions or practice work. This can include online interactions as well as face-to-face meetings.

4. Hold your learners accountable to finish their work.

Communicate how, when, and where participants should submit any final work. Identify clear deadlines, and if possible, provide reminders.

Extending the Learning for You

Below are some relevant resources. Pick a couple and commit to completing them in the next two weeks.

Courses in our library

- *Creating a Culture of Learning* with Britt Andreatta
- *Flipping the Classroom* with Aaron Quigley
- *Organizational Learning and Development* with Britt Andreatta
- *The Neuroscience of Learning* with Britt Andreatta
- *Teaching Techniques: Blended Learning* with Chris Mattia

Books

- Andreatta, B. (2015). *Wired to Grow: Harness the Power of Brain Science to Master Any Skill*. Seventh Mind Publishing.
- Brookfield, S. (2015). *The Discussion Book: 50 Great Ways to Get People Talking*. Jossey-Bass.
- Kapp, K. (2012). *The Gamification of Learning and Instruction: Game-based Methods and Strategies for Training and Education*. Pfeiffer.

Practice

- Use the techniques from this course to build your learning plan and agenda.
- Deliver your presentation, out loud in real time, at least three times.
- Use the websites below to find new activities for your workshop.
